Puro – more than just a bed

Stieglmeyer's latest release acute care bed. The Puro combines a user-focused design with simple operation and innovative solutions for hygiene. The MultiFlex+ - safety sides for one-hand operation with a soft lowering of the side supports allow easy access to the patient. Thanks to the planar design, which avoids dirt entrapment, and the cable integration into the frame, the bed can be cleaned quickly and easily.

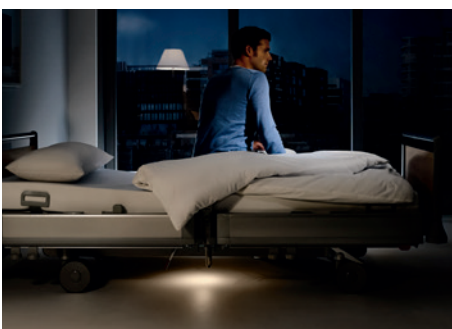

Vida – dependable and practical

The Vida combines modern design with great reliability and practicality. Its clean lines and clear design facilitate handling and reprocessing at the same time. Due to its large adjustment range this bed can be individually set to a comfortable and safe level for the patient. At the same time it can offer an ergonomic working height for the caregivers.

Deka – the budget-oriented hospital bed

The Deka is sturdily built to give long years of service and to withstand the tough conditions encountered in day-to-day hospital routines. Not only its design but also the quality of the materials make this bed easy to clean and reprocess. The bed is the manual hospital bed of choice with the best in class safe working load and operational specifications.

e-help – digital assistance systems for inpatient care

Intelligent sensor technology supports patients and care staff. The care staff usually ensures safety and a sense of well-being. These characteristics are likewise reflected in the technology of our hospital beds. The Out-of-Bed-function integrated in the hospital bed, for example, transmits a digital signal if help is required. Further features include brake alarm, collision switch, underbed light and memory functions which comprehensively supports patient safety and comfort.

Vertica clinic – the mobilisation bed

With the Vertica hospital bed the patient can be mobilised easily and without undue physical effort or additional personnel. The special design of the bed allows the patient to be raised easily into a sitting position. This way, they can eat meals in the customary way, seated comfortably at the provided table. As the mobilisation process continues towards a standing position, the patient finds safe contact with the floor or the footrests.

Sicuro pesa – the basis of intensive care

Hospital beds are an important part of the medical equipment in an intensive care unit and have a demanding role to play. The shock and CPR positions must be set in seconds without any delay. The Sicuro pesa intensive care bed can be adjusted very quickly in all directions with an electric motor and a safe working load of 260 kg. Bi-lateral tilt of 25° is also a standard feature, which improves patient wellbeing, pressure care and mobilisation.

Soreno eco – classic and stable

The Soreno eco bedside cabinet perfectly combines a functional design with an attractive value-for-money concept. The optional eating table is individually adjustable, and can also be retracted or removed completely. The cabinet's streamlined design makes it particularly easy to use on a day-to-day basis. The Soreno eco simply comes with individual functions and ample space at an attractive price.

Pleto – mobile and practical

Due to its high mobility, the server Pleto can be universally used in daily nursing routines. It can be positioned alongside beds, chairs and care chairs whenever necessary. Its advantageous C-frame guarantees high strength and stability. The height adjustment and pivoting table top allow the server to be flexibly adjusted to various uses, such as eating, reading a book or simply putting down a glass of water.
